DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 29, 2008 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4-6, 15, 16, 18, 19, 21 and 22 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1, 2, 4-6, 15, 16, 18, 19 and 21-38 are rejected under 35 U.S.C. 102(e) as being anticipate by Kato et al. (US 20020145702).

Regarding Claim 1: Kato et al. discloses a computer readable recording medium having a data structure for managing reproduction of video data recorded on the recording medium, comprising: a data area storing multi-path video data corresponding to a plurality of reproduction paths forming different versions of one title to be reproduced exclusively (**paragraph 180 and 182**); wherein the plurality of reproduction paths include a first reproduction path forming a first version of one title and a second reproduction path forming a second version of one title (**paragraph 0180 and fig. 6**), and the first reproduction path is not reproduced during reproduction of the second reproduction path and the second reproduction path is not reproduced during reproduction of the first reproduction path (**paragraph 0180**), wherein the first reproduction path and the second reproduction path include a common path portion referring a same clip file (**paragraph 0180 and fig. 6**); and a navigation information area storing playlists including reproduction information of the multi-path video data, wherein the number of the playlists is the same as the number of the reproduction paths of multi-path video data (**paragraph 212-213 and figure 14**).

Regarding Claim 2: Kato et al. discloses a computer readable recording medium of claim 1, wherein each of the playlists is associated with all of clip files for one path of the plurality reproduction paths (**paragraph 212-213**).

Regarding Claim 4: Kato et al. discloses a computer readable recording medium of claim 1, wherein each of the playlists, includes a plurality of playitems, different playitems included in the different playlists identifies the same clip file referred by the

common path portion of the plurality of reproduction paths (**paragraph 168, 0180 and figure 3**).

Regarding Claim 5: Kato et al. discloses a computer readable recording medium having a data structure for managing reproduction of video data recorded on the recording medium, comprising: a data area storing multi-path video data corresponding to a plurality of reproduction paths forming different versions of one title to be reproduced exclusively (**paragraph 182, 212-213**); wherein the plurality of reproduction paths include a first reproduction path forming a first version of one title and a second reproduction path forming a second version of one title (paragraph 0180 and fig. 6), and the first reproduction path is not reproduced during reproduction of the second reproduction path and the second reproduction path is not reproduced during reproduction of the first reproduction path (paragraph 0180), wherein the first reproduction path and the second reproduction path include a common path portion referring a same clip file (paragraph 0180 and fig. 6); and a navigation information area storing a playlist including reproduction information of the multi-path video data, wherein the playlist includes a plurality of playitems identifying different clip files for different reproduction paths, respectively (figure 20-21).

Regarding Claim 6: Kato et al. discloses a computer readable recording medium of claim 5, wherein the playlist further includes at least one playitem identifying the clip file referred by the common path portion of the plurality of reproduction paths (paragraph 212-213 and fig. 21).

Regarding Claims 15-16: Claims 15-16 are rejected for the same subject matter as claim 1 and 5 respectively as discussed above.

Regarding Claims 18-19: Claims 10-19 are rejected for the same subject matter as claims 1 and 5 respectively as discussed above.

Regarding Claim 21: Kato et al. discloses a method for reproducing a data structure for managing reproduction of video data recorded on a recording medium, the method comprising: reading at least one playlist including reproduction information of multi-path video data from on the recording medium, wherein the multi-path video data corresponds to a plurality of reproduction paths forming different versions of one title to be reproduced exclusively (paragraph 180 and 182), wherein the plurality of reproduction paths include a first reproduction path forming a first version of one title and a second reproduction path forming a second version of one title (paragraph 0180 and fig. 6), and the first reproduction path is not reproduced during reproduction of the second reproduction path and the second reproduction path is not reproduced during reproduction of the first reproduction path (paragraph 0180), wherein the first reproduction path and the second reproduction path include a common path portion referring a same clip file (paragraph 0180 and fig. 6); and reproducing selected one of the reproduction paths of the multi-path video data based on the read reproduction information (paragraph 0180-0181).

Regarding Claim 22: Claim 22 is rejected for the same subject matter as claim 21 as discussed above.

Regarding Claim 23: Kato et al. discloses a method of claim 15, wherein each of the playlists is associated with all of the clip files for one path of the plurality of reproduction paths (**Fig. 6a**).

Regarding Claim 24: Kato et al. discloses a method of claim 15, wherein each of the playlists includes a plurality of playitems, different playitems included in the different playlists identifies the same clip file referred by the common path portion of the plurality of reproduction paths (**paragraph 0180**).

Regarding Claim 25: Kato et al. discloses a method of claim 16, wherein the playlist further includes at least one playitem identifying the clip file referred by the common path portion of the plurality of reproduction paths (**paragraph 0180**).

Regarding Claim 26-28: Claim 26-28 are rejected for the same subject matter as claim 23-25 respectively as discussed above.

Regarding Claim 29: Kato et al. discloses a method of claim 21, wherein the number of the playlists is the same as the number of the reproduction paths of the multi-path video data.

Regarding Claim 30: Kato et al. discloses a method of claim 29, wherein each of the playlists is associated with all of the clip files for one path of the plurality of reproduction paths (**paragraph 0180**).

Regarding Claim 31: Kato et al. discloses a method of claim 29, wherein each of the playlists includes a plurality of playitems, different playitems included in the different playlists identifies the same clip file referred by the common path portion of the plurality of reproduction paths (**paragraph 0180**).

Regarding Claim 32: Kato et al. discloses a method of claim 21, wherein the playlist includes a plurality of playitems identifying different clip files for different reproduction paths, respectively (**paragraph 0180**).

Regarding Claim 33: Kato et al. discloses a method of claim 32, wherein the playlist further includes at least one playitem identifying the clip file referred by the common path portion of the plurality of reproduction paths (**paragraph 0180**).

Regarding Claim 34-38: Claim 34-38 are rejected for the same subject matter as claim 29-33 respectively as discussed above.
